WHAT IS THIN STONE?

K2's thin stone is real stone, cut to approximately 1" thick, making it light enough to be installed as an adhered veneer. It offers ease of application without losing the uncompromising beauty and durability of natural stone. It does not require special mechanical fastening or foundations, and because of its size and weight, costs less to transport and install than full thickness masonry. All of K2 Stone's thin veneers are offered with matching corners.

BENEFITS OF REAL THIN STONE

1. Uncompromising beauty
2. Unmatched by imitation
3. Does not fade
4. Safe to pressure wash
5. All natural, eco-friendly
6. Ideal for Interior and Exterior
7. No efflorescence
8. LEED and Built Green points
9. Adds value to your property
10. No Volatile Organic Compounds (VOC's)

LANDSCAPING PRODUCTS

OCEAN PEARL FLAGSTONE

FLAGSTONE

Ocean Pearl slate flagstone is available in multiple thicknesses and size configurations. It can be installed in either a sand or mortar bed, depending on the application and desired appearance. Flagstone makes an excellent ground cover.

OCEAN PEARL COBBLES

OCEAN PEARL FLAGSTONE

INDUSTRY TERMS:

"Stand up Flagstone" - Large format flagstone often called "Select" which must be shipped standing up because pieces are often too large to lay down on a pallet without protruding past the edges. "Patio" or "Lay down" flagstone is small enough to fit on a pallet.

OCEAN PEARL COBBLES

OCEAN PEARL COBBLES

Available in 8x8," 6x8" and 4x8" dimensions, Ocean Pearl full bed cobbles can be sand-set to recreate an old world look. They are offered in two thicknesses, 2 ½" for sand-set applications and 1" thick for mortared applications. These are among the most beautiful and durable pavers anywhere.
