

Beauty and Sustainability

McNear Brick & Block worked with Case + Abst Architects to supply custom shapes for the Award-winning, First Congregational Church in downtown San Francisco. McNear products were selected not only for their color, finish, and design flexibility, but also because their high recycled content allowed the builders to attain their environmental rating goals.

McNear Clay Brick are manufactured with 30-100% Post-consumer, Recycled Content.

Introducing Glazed Thin Brick

We fire ceramic glazes over our Thin Brick to create a product line that blends the beauty of ceramic tile with the strength and utility of brick.

Applications: Glazed Thin Brick have a hard, durable, and cleanable surface, which makes them perfect for entryways, restaurants, kitchens, and bathrooms. They can also be used as colored accents on ordinary brick walls, framing windows and doorways, or as bands or quoins. Glazed Thin Brick create a richly pigmented, durable, low-maintenance, graffiti-resistant surface.

Sizes and Shapes: McNear Glazed Thin Brick can be ordered in all our Thin Brick sizes and shapes, including Corners and Caps (See pages 15-16).

Colors: While starting with a standard palette of colors, we have the ability to produce or match virtually any color.

Texture: Our Glazed Thin Brick are created from actual clay brick, and they incorporate the subtle marks and textures that are clay brick's hallmark. Glazed Thin Brick are typically produced on flat, square-edged bricks, but we also have the ability to glaze our distinctive Sandmold textures.

Custom Glazed Colors in Sandmold

Pewter	Blue 166
Roswell	Blue 166D
Persimmon	Sapphire
Orange	Mint
Scarlet	Avocado
Biscuit	Black Matte
Dark Brown	Anthracite
White Matte	White

There is a 100 square foot minimum order on Glazed Thin Brick.

Clay Brick

Thin Brick, Face Brick

McNear Brick & Block's roots go back to 1868, making us one of the country's oldest brick manufacturers. We produce a broad selection of Face Brick, Thin Brick, and Brick Pavers in colors and textures ranging from the soft, handmade looks of our Sandmold Series, to the "reclaimed" aesthetic of our Old California Series, to the vibrant, sharp colors and edges of our Commercial Series. In addition to the products shown within these pages, we have the capability of manufacturing custom blends, shapes, and colors. All the colors depicted herein are available as Face Brick, Thin Brick, and as Brick Pavers. McNear brick products meet ASTM C216 and C1088 Grade SW standards.

McNear Clay Brick are manufactured with 30-100% Post-consumer, Recycled Content.

The Benefits of Thin Brick

McNear Brick & Block recognizes that Thin Brick is an important and growing sector of brick construction, and we offer many shapes and sizes of Thin Brick to be used either independently, or in conjunction with matching full-depth brickwork.

This newest generation of brick products has much to offer:

- No expensive footings or supports required
- Great for remodels
- Faster construction times
- Applicable to any surface, interior or exterior
- Thinner walls, creating more usable space
- Easier and cheaper shipping and handling
- New avenues for brick use (ie: ceilings)
- Much lower embodied environmental costs
- No seismic concerns
- Works with Panelization and Precast construction.
- Do-it-yourselfer friendly

Thin Brick gives these benefits without sacrificing any of the durability, low maintenance, beauty, and value of traditional brick construction.

SANDMOLD SERIES

Capture the look and feel of a Manhattan Loft, Tuscan Farmhouse, or a Colonial Inn with these exquisitely hand-crafted bricks. Their softened edges and subtle irregularities truly replicate authentic antique bricks.

BrickFast and Precast Panels

BrickFast Panel System

The BrickFast Panel System is an innovative new way to quickly, accurately, and securely install Thin Brick.

Note: BrickFast Slots can be put into any McNear Thin Brick.

McNear Thin Brick can be ordered with a special slot cut into the back, which allows them to hang from tabs on the BrickFast panels.

Once mortar has set in the spaces between the bricks, they are permanently locked in with a strong mechanical bond.

Thin Brick Before & After

Precast Panels with Thin Brick

All of McNear's Thin Brick, including our Sandmolds, can now be used in Precast Concrete Panels.

Call or e-mail us to learn about this technology at 415-454-6811 or sales@mcnear.com.
