Pine Hall Brick Co, Inc. celebrates over 75 years of service to commercial and architectural customers. Whether it's a 10 story addition to a large medical center or a local bank office, we are known as the company "easy to do business with". Our colors, product quality, technical service, packaging and deliveries are geared to satisfying our customers by eliminating their on-the-job and in-the-wall problems.

Our Triassic shale brick is fired to the highest ASTM standards and crafted with sand or engobe coatings to give the discriminating designer

many choices. In addition, we offer a full line of special shape brick to transform any building into a work of art. We view special shapes as an integral part of our service program.

Pine Hall Brick offers architectural presentations through the AIA/CES program that include tours of our paver plant & two face brick plants, masonry construction, detailing & specification, and flexible base paving with clay pavers.

If you're ready to build, or just in the planning stages, give us a call. We'll help you discover the practical elegance of building with brick. Pine Hall Brick.
