Omega Products International, Inc.

Innovatively Leading the Industry

Omega Products takes pride in providing a large selection of stucco and acrylic finishes that can produce endless design possibilities. All products are manufactured in our state-of-the-art facilities to our exacting quality standards. Only the best materials are utilized to ensure consistent and vibrant colors. Additionally, they are backed by Omega's excellent technical support and warranty plans.

Omega offers 45 standard stucco colors that are shown in this color chart. Our sophisticated color lab can also produce a spectrum of custom colors. Provide us a color sample and we can match it.

Let Omega color your world, inspire you and bring your project to life.

ColorTek Premium Exterior Stucco

ColorTek is a premium, factory blended, stucco finish manufactured from portland cement, hydrated lime, graded aggregates, and proprietary performance enhancing additives. ColorTek comes in the aggregate combinations that allow design flexibility and a variety of finish textures. The following aggregate combinations are available, in order of aggregate size:

- Coarse: Used to create heavy laced texture, sand finish, or machine dash finish.
- 16/20: Used to create traditional texture, sand finish, or machine dash finish.
- 20/30: Used to create a fine texture or sand finish.
- 30/30: Used to create a uniform fine sand finish.
- Smooth Coat: Used to create a smooth Santa Barbara or Mission type finish.

ColorTek is available in Base 2 (grey), Base 10 (white), Base 1 (white/grey) or Base 5 (dark grey), which may be colored in the field using the Omega ColorPak system. Alternatively, ColorTek is offered as a factory mixed colored stucco. Minimum quantities may apply when ordering factory blended products.

Features
- Integral Color
- Fire Resistant
- Impact Resistant
- Economical
- INSECT RESISTANT

Benefits
- Long lasting, uniform color
- Resists mold and algae
- Resists impact damage
- Lower cost and easy to apply
- Odorless, fast drying, and VOC free

OmegaFlex 100% Acrylic Stucco

OmegaTek finishes were the first 100% acrylic stucco coatings designed for exclusive use over cement-based substrates. OmegaTek can create a look that is similar to traditional Portland cement plaster finishes, but with more uniform color, less efflorescence, improved water-resistance, and less cracking.

These attributes make OmegaTek the obvious choice for both commercial and residential projects. OmegaTek may be used as a high grade finish for the Diamond Wall One Coat Systems, standard three-coat systems, as well as properly prepared concrete surfaces. OmegaTek can also be applied as an interior finish over various types of interior wall boards and ceiling surfaces.

OmegaTek is available in a variety of colors, including the ColorTek colors shown in this chart. The standard OmegaTek colors can be found in the Omega Acrylic Color and Texture Collection.

ColorTek Premium Stucco Colors

ColorTek can produce a wide variety of textures. Some of the most popular texture choices are shown below. Actual stucco textures will depend upon application method, job conditions, and other factors. The cost to achieve these textures will vary due to the material and labor required. Please consult your applicator for actual costs related to a specific finish texture.
