E-Z Set™ Natural Stone Thin Veneer...

Beautifully cut to fit your budget.

FINE QUALITY NATURAL STONE THIN VENEER FOR ALL YOUR BUILDING NEEDS

Advantages of Natural Stone Thin Veneer

- *It's the real thing* - others can only attempt to imitate the look, feel, and value of real stone
- *Durability* - formed over millions of years by mother nature not in hours by man
- *Color* - non-fading, unlike imitation stone made of colored concrete
- *Variety* - each piece is individually distinct
- *Shapes / Textures* - limitless, since natural stone is not made by pouring concrete in a mold like imitation stone
- *Non-patterned* - real stone does not have an identifiable repeating pattern like imitation stone
- *No maintenance* - premium quality natural stone will always stand the test of time
- *No support ledge required* - at less than 15 lbs. per square foot, natural stone thin veneer can be used on a variety of interior and exterior applications including remodel projects

E-Z Set™ Natural Stone Thin Veneer is a premium quality natural stone that comes from our own world class quarries. It is a truly elegant and environmentally green product that will bring timeless value and endless aesthetic pleasure to your important project.
