ITALIAN RENAISSANCE
Interlocking Paving Stones

The Italian Renaissance collection recreates the textured surface and hand-cobbled appearance of stone slab roads once naturally antiqued by carriage wheels and horses’ hooves.

Traditional large rectangles are complemented by two smaller sizes and shapes.

TYPICAL PAVER INSTALLATION*

1. Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material (typically 3” - 6” for pedestrian/ light vehicular traffic and 8” - 10” for driveway applications), or as otherwise directed by site engineer/architect/landscape architect.

2. Install edge restraint using concrete curb, concrete toe or edging.

3. Place bedding course of sharp, normal-weight screening or concrete sand to a uniform depth of approximately 1” leveled to grade.

4. Install Basalite Pavers hand tight with joints approximately 1/8” (allow required, cut stones with an approved cutter to fit accurately.

5. Temp pavers with mechanical vibrator, uniformly level to grade and free of movement.

6. Fill voids in joints by sweeping dry, fine, sharp sand over pavers.

*The installation instructions and illustrations shown are a basic overview of paver installation methods. Due to the variety of applications, please refer to the Basalite® installation guide, or visit us online at basalite.com.
